

MMS Presentation on Deep Water Oil Spill Risks

MMS Presentation on Deep Water Oil Spill Risks

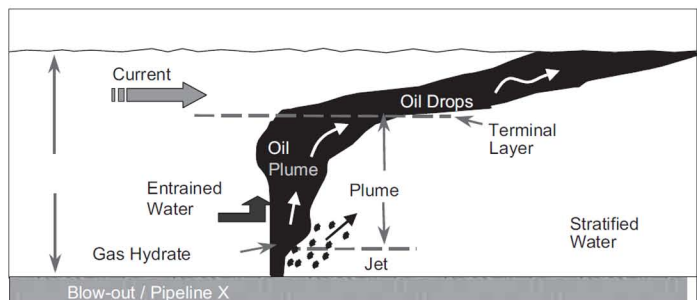

MMS Presentation on Deep Water Oil Spill Risks

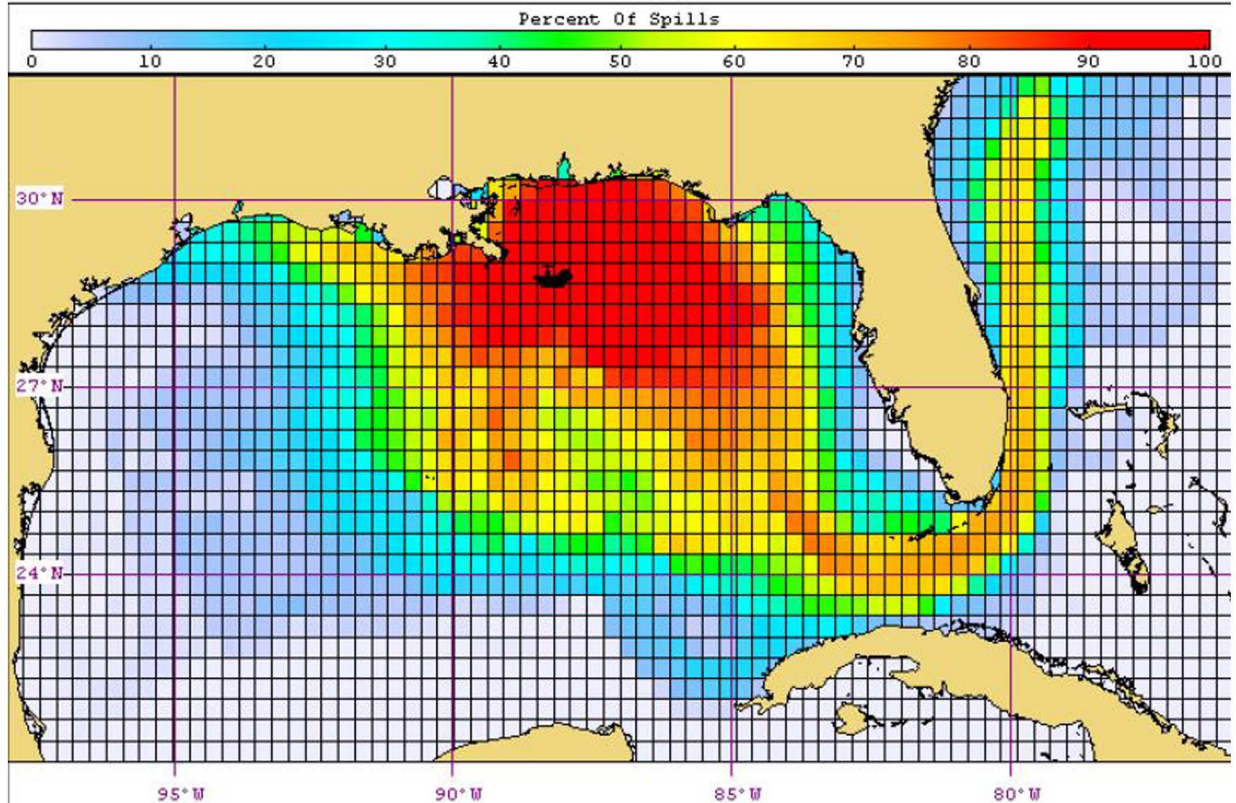

### Why a field experiment?

- Collect realistic field data
- Test & validate subsurface surveillance
- Provide data to validate models
- Input to environmental assessment documents

Schematic diagram depicting the basic physical processes involved in a deepwater subsurface oil and gas release.

## They broke it - You bought it!

LET'S SEE - first they destroy the GULF WITH THEIR GUSHER - Now, our US BP Coast Guard has become their ENFORCERS - hell, they already have their BLACKWATER!

**This from Science Blogs** - Journalists who come too close to oil spill clean-up efforts without permission could find themselves facing a **\$40,000 fine** and even one to five years in prison under a new rule instituted by the Coast Guard late last week. It's a move that outraged observers have decried as an attack on First Amendment rights.

Even - CNN's Anderson Cooper describes the new rules as making it "very easy to hide incompetence or failure." Our? Coast Guard's order states that "vessels must not come within 20 meters [65 feet] of booming operations, boom, or oil spill response operations under penalty of law."

But since "oil spill response operations" apparently covers much of the clean-up effort on the beaches, CNN's Anderson Cooper describes the rule as banning reporters from "anywhere we need to be."

So we now know *BEYOND A REASONABLE DOUBT*: that the Coast Guard, now working as a branch of **BEE PEE's** private security, that the price we will all pay, is the death of the GULF OF MEXICO, And with it the death of all the sealife includes, ALSO - YOUR 1st AMENDMENT, and your right to know, what the POLLUTERS ARE UP TO, because their private security guards we could call them BLACKWATER... is now composed of what we used to call the BP Coast Guard. They aren't guarding you, former swimmers and former fishermen and women. They're out there to protect OUR CORPORATE OVERLOADS.
